Preface	I
Executive Summary.....	II
Introduction	IV
Methodology.....	VI
1. Chapter 1 - Livestock Farms	
1.1 Number of Registered Livestock Farms - 2023	1
1.2 Farm Registration Renewal (Online) - up to 2024.01.30	2
2. Chapter 2 - Livestock Population Distribution	
2.1 Cattle Population - 2023.....	3
2.2 Buffalo Population - 2023.....	4
2.3 Goat Population (2019 - 2023).....	5
2.4 Swine Population (2019 - 2023).....	6
2.5 Annual Average Population of Poultry (2020 -2023).....	7
2.6 Poultry Breeder Population - 2023.....	8
3. Chapter 3 - Meat, Egg and Day Old Chick Production	
3.1 Chicken Meat, Egg and Pork Production (2019 - 2023).....	9
3.2 Meat Based Value Added Production (2019 - 2023).....	9
3.3 Commercial Chick Production (2022 - 2023).....	10
3.4 Beef Production (2019 - 2023).....	11
3.5 Mutton Production (2019 - 2023).....	12
4. Chapter 4 - Milk Production and Collection	
4.1 Cow Milk Production (2019 - 2023).....	13
4.2 Buffalo Milk Production (2019 - 2023).....	14
4.3 Total Milk Production (2019 - 2023).....	15
4.4 Milk Collection and Chilling Capacity - 2023.....	16
4.5 Milk Collection by Quarters - 2023.....	17

5. Chapter 5 – Imports and Exports (2019-2023)	
5.1 Import of Milk and Milk Products.....	18
5.2 Import of Milk and Milk Products in LME.....	19
5.3 Average Prices of Whole Milk Powder in International Market.....	20
5.4 Export of Milk and Milk Products	21
5.5 Export of Milk and Milk Products in LME	22
5.6 Import of Meat and Meat Products	23
5.7 Export of Meat and Meat Products.....	24
5.8 Import of Feed Ingredients.....	25
6. Chapter 6 – Feed Production and Prices (2019 – 2023)	
6.1 Animal Feed Production	26
6.2 Animal Feed Ingredient Production	27
6.3 Compound Feed Prices.....	28
6.4 Retail Prices of Feed Ingredients	29
7. Chapter 7 – Livestock Product Prices	
7.1 Prices of Poultry and Poultry Products – 2023.....	30
7.2 Retail Prices of Meat and Eggs (2021 – 2023)	31
8. Chapter 8 – Cost of Production and Availability (2019 – 2023)	
8.1 Cost of Production of Livestock Products	32
8.2 Per Capita Availability of Livestock Products per Year	33

PREFACE

The Division of Livestock Planning and Economics (LPE) collects livestock-related data from various government and non-governmental organizations, since it has become an obligatory function to compile, analyze and maintain statistics of all industries ensuring usage and identify current issues, trends and gaps in the sector.

Livestock Planning and Economics division maintains several databases providing information on animal population, number of farms and livestock production etc. collected data through Government Veterinary Offices covering whole island. The division also obtains data such as import, export, prices of livestock products etc. from Sri Lanka Customs and various other sources.

Therefore, I would like to extend my sincere gratitude to all the data providers and contribute this publication to be a reality. I acknowledged the efforts of all Provincial Directors (PD), Deputy Provincial Directors(DPD), District Veterinary Surgeons(DVS), Government Veterinary Surgeons (GVS), Livestock Development Instructors (LDI) and all the other provincial officials for providing all requested data in time. Also, other data providers of the government sector such as NLDB, MILCO, Department of Census and Statistics, Department of Customs and private organizations viz. dairy producers, milk processors, and poultry producers are also well appreciated.

At the same time, I am thankful to all the Veterinary Surgeons (VS), Livestock Development Officers (LDO) and Development Officers (DO) in LPE Division for collecting, compiling and invaluable contribution made to analyzing and summarizing them.

I am thankful to Dr.K.M.H.G.S. Priyantha (Director/Livestock Planning and Economics) for the guidance given to compile the Bulletin. I also appreciate Mrs. I.S. Hamangoda/ Statistician in the LPE division who contributed in editing and publishing this bulletin in time.

I hope this publication will be immensely useful for policymakers, planners, and stakeholders of the livestock industry.

Dr. (Mrs.) K.A.C.H.A. Kothalawala,
Director General,
Department of Animal Production and Health,
Peradeniya.

EXECUTIVE SUMMARY

At present, the livestock sector's contribution to the total GDP is 1.4%. Future planning for further development based on past trends and forecasting is an obligatory requirement of the industry. In this scenario, data pertaining to the livestock sector need to be collected, analyzed, and interpreted.

Based on the collected data, the analysis revealed that the cattle population in 2023 decreased by 1.6%, and the buffalo population decreased by 1.5% compared to 2022. Despite this situation, the total milk production in 2023 decreased by 2.5% compared to 2022. However, formal milk collection in the country in 2023 increased by 6%. Imports of milk and milk products increased by 31% compared to 2022, and therefore the annual per capita availability of milk in 2023 increased to 39.98 L from 34.60 L in 2022.

Chicken meat production increased by 3.5%, whereas egg production decreased by 2.2% in 2023. Therefore, the per capita availability of chicken meat increased by 3.6% in 2023. To fulfill the local demand, 168.53 million table eggs were imported from India during the year. Including the imported table eggs, the per capita availability of eggs increased from 93.40 eggs per year in 2022 to 99.74 eggs per year in 2023. The availability of broiler day-old chicks in 2023 increased by 3%, while the production of layer day-old chicks showed a significant increase of nearly 43%. Furthermore, commercial poultry feed production also increased by 19%. The average retail price of an egg in 2023 was around Rs. 51.00, while the price of a whole chicken was around Rs. 1,450.00.

Goat production is still recognized as a traditional form of livestock production among farmers, especially in the dry zone. Out of the total population of 754,518, the majority is concentrated in the dry and intermediate zones. The highest population (274,647) was reported in the Eastern Province, and 63% of the total goat population is located in the Eastern and Northern provinces. The mutton, which is the main output of the goat industry, is around 2.75 ('000 MT), resulting in per capita consumption of 0.12 kg per year in 2023.

Beef production slightly decreased to 27.28 ('000 MT), and per capita availability is around 1.23 kg/year in 2023. The average retail price of beef is around Rs. 2,020.00/kg.

Swine production is mainly concentrated in the western coastal belt of Sri Lanka. The total pig population slightly increased in 2023. Out of the total pig population of 170,409, 68% are reared by farmers in the Western and North Western provinces. However, the annual swine meat production is 9.37 ('000 MT), resulting in per capita consumption of 0.43 kg/year in 2023.

INTRODUCTION

Small-scale farming is still the major category in the livestock sector in Sri Lanka where their livelihood involves with minimum labour, commonly available feed resources and marginal lands. However, going in parallel to crop production, livestock farming is also improving with new knowledge and technologies and by upgrading the genetic potential of animals for improvement of the productivity of animals in the last decade.

In compared to the industry and other service-providing sectors, agriculture-based sectors are still slow growing and therefore the contribution of agriculture, forestry and fisheries sectors to the national GDP still remains at 8.3% in 2023 (DCS website), while the contribution of livestock alone was at 1.4% for the recent years.

The consumption of livestock products has been increased dramatically over the last two decades along with the increase in per capita income, urbanization and sociocultural changes. Livestock production, while helping to improve the nutritional status of the country, it also offers many livelihood opportunities for people in the country directly and indirectly. Most of the livestock products such as milk, meat and eggs are now converting to numerous value-added products and some of those are exported to other countries. In addition, some of the byproducts generating from the livestock industry utilize as raw materials in other industries like leather, fertilizer, feather, etc. Wastes of livestock use in Renewable energy production (Bio gas) which in turn helps to reduce Green House Gas emissions. Domestic biogas units associated with cattle and pig farming have proven as successful alternative energy source for many domestic energy needs in rural areas of the country. The nature and the labour-intensiveness of many livestock operations effectively harnessed for rural employment creation, livelihood improvement and poverty alleviation.

Dairy Sector

Traditionally dairy animals are used for multiple functions like producing milk for household consumption, male animals for paddy cultivation and transport of goods and people and dung as an organic fertilizer and fuel. They may act as a capital reserve and provide employment to help farmers over lean periods and give greater income stability. Presently, it is one of the major employments of rural communities. Dairy animals generate a continuous flow of income and act as a cushion against income

shocks arising in any disaster of earnings. Milk is a 'cash crop' for smallholders, converting low-value agricultural byproducts, crop residues and cheap family labor into a value-added market commodity. Regular milk sales allow them to move from subsistence to earning a market-based income.

Although small-scale dairying is still predominant in the country, it is in a transitional period to convert to medium and large-scale farms resulting conversion of livelihood operations of the system to a profitable industry. Further, the growing trends for organic farming will open another window for market-based income. Accommodation of local production in the market chain has become a challenge. Therefore, the development of infrastructure such as milk collecting networks, facilities for value addition and further processing and quality assurance will be required for smooth growth of the industry.

Of the 370 million liters of milk that was produced locally, the volume of milk entering the formal milk market in 2023 was 244.90 million liters while the rest was channeled through informal routes and also consumed domestically. Comparing to the previous year, milk production was decreased by 2.5% and formal milk collection was increased 6.0% respectively.

Poultry Sector

The poultry industry has shown a significant difference after 1977 with economic reforms in Sri Lanka. Since 1980 monthly average poultry population has grown from 6.3 million to 30.23 million in 2023. It was a slight decrease comparing to the 2022 population (31.35 million). The per capita consumption of chicken meat and egg had changed from 100 g and 38 eggs in 1980 to 10.64 kg and 100 eggs in 2023. The poultry production is in private hands with forward contracts for input supplying and marketing mainly in small-scale broiler production. Therefore, small-scale rural farmers get their inputs at their doorstep and have to market their products at pre-agreed prices. The consumption needs of poultry products are totally supplied by domestic enterprises.

Goat Sector

Goat production (0.75 million) is a common small animal production mainly comprised of intensive and semi-intensive management systems. In both systems, animals are reared primarily for mutton, but some farmers keep animals mainly for milking purposes. Goat milk is becoming popular due to its merit in contributing to health benefits and therefore rearing dairy goats under intensive management is becoming popular in the recent past, with rapid increase in Central and Western provinces. Goat milk has been catching good demand in supermarkets at higher prices, receiving reasonable profit for dairy goat keepers.

Swine Sector

Pig production is mainly concentrated in the coastal belt of Western and North-Western provinces of Sri Lanka. Although the swine population has remained static at around 80,000 over the past decades, it tends to increase in 2016. Highly commercialized large-scale farms with three-way crosses (Landrace, Large White and Duroc), middle-scale intensive farms and semi-intensive backyard farms with crosses of indigenous pigs produce animals for the pork industry in the country.

Data collection and dissemination is a requirement for proper development plans of the Industry for the future. In this situation data related to the livestock sector is necessary to be collected, analyzed, interpreted and disseminated to the users. The objective of this document is to compile and disseminate the collected data for planners and policymakers of the sector.

METHODOLOGY

Data for this document has been collected from several government and private agencies; and some of the data were analyzed to obtain annual figures. Economic models and formulas were used to estimate the values. Data collected from reports, sample surveys by the LPE Division, and secondary data published by other agencies were used in these models.

Figures on farm numbers and animal populations (cattle, buffaloes, goats, sheep, pigs and poultry) were compiled and presented using the data collected from 337 divisional veterinary ranges using a given format to collect information on the livestock sector. We assumed that the data sent were from registered farms of veterinary ranges.

Slaughter statistics that were obtained from the Department of Census and Statistics (DCS) and data from the LPE survey were used to estimate meat production. Poultry population, chicken meat production, egg production and commercial chick production were estimated using monthly reports that were obtained from the poultry breeders and processors.

Milk production was estimated using milk collection data from 14 main milk collecting agencies and the data sent in monthly by all veterinary offices in the country.

The data on imports and exports of milk and meat were obtained from the Statistics Division of Sri Lanka Customs. Import data of animal feed Ingredients were also obtained from the Sri Lanka Customs and the Animal Quarantine Stations of DAPH.

The data collected from the Veterinary Regulatory Affairs (VRA) of DAPH were used in the estimation of animal feed production. Local production of animal feed ingredients was obtained from the Department of Census and Statistics.

Compound Feed prices were collected from feed manufacturers and retail prices of feed ingredients were collected from the Colombo market. Prices of poultry and poultry products were collected from breeder and commercial poultry farms. Retail market prices for livestock products were obtained from the reports of HARTI (Hector Kobbekaduwa Agrarian Research and Training Institute).

Some of the information provided in this bulletin were compiled and analyzed by the Division of Livestock Planning and Economics, DAPH to display annual values, production estimates, economic indicators and the trends in livestock production.

Chapter 1 - Livestock Farms

1.1 Number of Registered Livestock Farms -2023

Province	Cattle	Buffalo	Goat	Swine	Sheep	Poultry						
						Layer			Broiler			Backyard
						Large Scale (>50,000)	Medium Scale (1001 - 49,999)	Small Scale (<1000)	Large Scale (>50,000)	Medium Scale (5001- 49,999)	Small Scale (<5000)

Chapter 8. Cost of Production and Availability

8.1 Cost of Production of Livestock Products (2019 - 2023)

Item	2019	2020	2021	2022	2023
Cost of Production of Chicken Meat (Rs/kg)					
Large scale					
Live Weight	193.93	212.34	342.75	671.95	567.20
Dressed Weight	267.23	287.77	374.28	753.77	784.48
Frozen Chicken	314.30	341.80	389.30	768.86	884.61
Small Scale					
Live Weight	337.49	342.64	333.69	643.95	716.26
Dressed Weight	404.40	412.35	457.78	870.60	1,025.49
Cost of Production of Eggs (Rs/egg)					
Large Scale	13.70	13.87	17.98	35.67	32.82
Small Scale	14.39	14.57	18.06	38.10	37.85
Cost of Production of Milk (Rs/litre)					
Intensive System	48.32	49.28	69.30	81.22	80.92
Cost of Production of Mutton (Rs/kg)	869.42	956.87	1,442.18	1,760.83	1,826.11
Cost of Production of Beef (Rs/kg)	372.32	380.77	406.61	476.20	550.95
Cost of Production of Pork (Rs/kg)					
Live Weight	234.69	245.29	288.00	343.23	380.27
Dressed Weight	338.80	353.94	414.96	511.54	565.27

8.2 Percapita Availability of Livestock Products Per Year (2019 - 2023)

Item	2019	2020	2021	2022	2023
Milk and Milk Products(LME) -/	52.26	52.81	48.69	34.60	39.98
Meat (kg)					
Chicken	10.12	9.79	10.68	10.27	10.64
Beef	1.37	1.35	1.26	1.25	1.23
Mutton	0.12	0.14	0.15	0.14	0.12
Pork	0.42	0.41	0.44	0.43	0.43
Eggs(number)	120.23	110.71	132.30	93.40	99.74
